Yung Chak Anson Tsang

https://masteranson.github.io | Anson.Tsang@KTLucid.com | Native Languages: English, Mandarin, Cantonese

Education

Georgia Institute of Technology (*GPA: 3.57/4*) **Atlanta, GA**
B.Sc. in Mechanical Engineering, Minor in Scientific and Engineering Computing *Expected Spring 2023*

Work & Research Experience

Hatzell Lab **Atlanta, GA**
Undergraduate Research Assistant *Aug 2022 – Current*
• Currently working on electrocatalysts for electrochemical nitrogen reduction towards ammonia in aqueous electrolytes

Tesla Inc **Palo Alto, CA**
Battery Engineering Intern *May 2022 – August 2022*
• Mechanical design and analysis for structural battery pack program for the Model Y car
• Directly responsible for many structural calculations and data analysis for passive propagation resistance testing
• Spearheaded various cost-down mechanical redesigns with potential savings of >20 million for FY23

Apple Inc **Cupertino, CA**
Display Mechanical Engineering Intern *May 2021 – August 2021*
• Developed a conjugate heat transfer model for the Apple Watch Ultra display module,
• Investigated various mechanical design and packaging strategies to maximize screen brightness under different use conditions

Chen Research Group **Hong Kong University of Science and Technology, HKSAR**
Research Assistant *August 2020 – May 2021*
• Designed a patent-pending "thick" bi-continuous nano-porous zinc anode for applications in secondary batteries
• Investigated structural properties of nanoporous metals through various microscopic/tomographic techniques and electrochemical impedance spectroscopy from custom electrochemical test cells

AMPD Energy **Hong Kong Science & Technology Park, HKSAR**
Mechanical Engineering Intern *May – August 2020*
• Created multi-physics and conjugate CFD thermal models to analyze and optimize cooling system design
• Root-caused and resolved various production/launch related issues with OEMs
• Spearheaded various mechanical re-designs and reduced overall weight by >200kg
`

Environmental Process Modelling Centre **Nanyang Environmental and Water Research Institute, SG**
Research Assistant *May - August 2019*
- Conducted large scale molecular dynamics simulation to study nanoscale kinetics of interfacial water evaporation
- Utilized drone mounted hyperspectral imaging to acquire field data used for remote water quality monitoring

KT Lucid LLC – Signet/Championship Rings Manufacturer and Retailer **Shrewsbury, MA**
Co-Founder *October 2017 – May 2020*
- Designed, manufactured, and sold custom signet rings to boarding schools and universities in the United States and Japan
- Developed a custom signet ring manufacturing process and supply chain pipeline in China

Relevant Projects and Leadership

HyTech Racing **Atlanta, GA**
President (Previous: Lead Electric Drives Engineer 2019-2021) *June 2021 – May 2022*
• Lead team of 120 undergraduate/graduate students to develop, build, and test a fully electric race car, achieving 3rd overall at Formula Michigan 2022
• Spearheaded the development of a custom 300V $LiCoO_2$ battery pack with 120kwh/kg specific energy and 60kW of peak power

Hong Kong Student Association **Atlanta, GA**
Founding President *Aug 2018 – May 2019*
• Assisted all incoming/exchanging student from Hong Kong and Macau SAR and hosted various social/networking events
